Go from the meeting into action!

The Get Together platform contains pre-formatted experiences designed for specific outcomes, and is essentially an ad hoc digital meeting-in-a-box that allows you to hold instant interactive experiences. All data created in these sessions are captured and aggregated in real-time, and can be used for further follow-up and analysis. The capturing of feedback and action builds on:

- Voting, rating and prioritization
- Crowdsourcing
- Brainstorming
- Case work
- Action planning

Get Together tool capabilities are built on the BTS Pulse™ Platform, and all features can be used for enhanced social and extended experience design.

Customization

BTS offers both basic and more advanced Get Together customization. The basic, customized to the client's meeting purposes, engages participants while capturing their feedback and actions for groups without additional need for our specialists. It allows you to customize our pre-formatted templates, smaller flow and visual design adjustments.

The Get Together tool can be customized beyond standard offerings to meet specific client needs. This customization includes designing a new meeting format, extended client branding, as well as added functionality, question types, and more.

The Get Together tool can also be combined with, or contain, additional experiences - such as mini-simulations (e.g. what-if analysis for decision-making), learning & reference content, go-do activities, coaching, and Assessments.
