

Leading during uncertainty

Client need

Facing challenging times within a difficult market, a recent acquisition, and quality issues, a CPG business was missing its financial targets and recognized the need to better develop its leaders. The organization wanted to equip leaders with the skills to manage through and out of this period of uncertainty.

The solution...

The organization partnered with BTS to create a solution that:

- Allowed every leader in the business to experience a structured **1:1 coaching program**.
- **Used digital and remote technology** to connect leaders to an executive coach, allowing leaders to explore a set of topics.
 - Covered resilience, leading in uncertainty, creating energy for change, and building momentum.
 - Explored digital content prior to each session to **identify best practices and key ideas**, which they could then apply and personalize with their coach.

Results

The business bounced back to **meet its revenue and profit targets** in the year the program was run

Leading in Uncertainty

“If it’s not me then who?”

In this session we help you to focus on what you can control and act upon confidentially. We help you determine what matters and cut out the noise. Visioning

“I know where I’m going”

Despite uncertainty, great leaders provide a sense of direction. They do this by creating tension between where we are now and where we want to be, and then know how to communicate it to others in a compelling and inspiring way.
